MIKE OLDFIELD

It all began when an album called *Tubular Bells* was released on May 25, 1973. It was a solo debut album for 20-year-old Mike Oldfield, and the album has now sold over nine million copies! Despite this early success, Oldfield remained a recluse, and moved to a remote part of Hertfordshire, from where he produced more work, including the albums *Hergest Ridge* and *Ommadawn*. In 1979, he decided he had been away long enough, and he now travels widely, flies his own helicopter, and goes on the road with a 46-piece band.
